

WHAT:

Maintaining Independence and Sobriety through Systems Integration, Outreach, and Networking (MISSION) is a 24 month program for adults 18 and up. Intended to help those experiencing homelessness struggling with substance use and/or co-occurring mental health disorder seek and maintain permanent housing and support recovery.

WHO:

Individuals have to meet our criteria for homelessness: homeless in a shelter, sleeping outdoors in a car/camper/tent or doubled-up in a crowded home or couch-surfing and interested in treatment for SUD including mental health support.

WHY:

- ✓ **Low client-to-staff ratio (15:1)**
- ✓ **MISSION clients receive case management, peer support and other housing support services.**
- ✓ **8 out of 10 clients housed within 6 months.**
- ✓ **On average, MISSION clients obtain an increase of \$150 in monthly income.**
- ✓ **The SPDAT is used to prioritize housing services for homeless individuals based upon their acuity. On average, MISSION clients show a decrease in the SPDAT score over time. Improvements are seen in Physical Health and Wellness, Interaction with Emergency Services and Substance Use.**

WHERE:

Allegan County Community Mental Health Services
