## Caring for Allegan County

## CHILDREN'S SUPPORT COORDINATION AND CASE MANAGEMENT

At OnPoint, children and their families are connected to the community with needed resources, get help working with schools and other service providers, and get help connecting and keeping track of the services needed for everyone to live a happy and healthy life.

## OUR MISSION

Improving the lives of people in Allegan County through exceptional behavioral health and homelessness services.

**Thursdays until 7:00 pm**

## Children's Services

Heart of West Michigan  
United Way

## AUTISM SERVICES

---

Allegan County residents with an Autism diagnosis, from birth to 21 years old, who have Medicaid or MI Child insurance, may qualify for Applied Behavior Analysis (ABA) therapy.

People can be screened and referred for testing, and if they qualify, they can be connected to providers for ABA therapy and treatment in a clinic, home, or community setting to meet the needs of the individual and family.

## OUTPATIENT THERAPY

---

Children's Outpatient Services provides in-office mental health therapy for children ages 3 to 17 and their families. OnPoint therapists help families find solutions to their problems that focus on the person, are effective, and build on their strengths.

## HOME BASED SERVICES

---

We provide intensive services to children and their families who need several types of mental health support. Treatment is based on the child's needs, with a focus on the family.

Services are given in the family's home or community for at least 4 hours per month.

## INFANT MENTAL HEALTH

---

The Infant Mental Health (IMH) model is a needs-based, relationship-focused program that helps parents and their babies or toddlers in the mental health system.

Services are offered to pregnant mothers and children up to age 3.

## PSYCHIATRIC SERVICES

---

Children may need to take medication to assist with a reduction of symptoms. The doctor (psychiatrist) meets with the child and family or caregivers to create a plan that works best for the child.

## INTENSIVE CARE COORDINATION WITH WRAPAROUND

---

Wraparound is a personalized planning process that helps children who may be involved with many child services, are at risk of being placed outside their home, have had little improvement from other mental health services, or have many providers working with multiple children in the family without meeting goals.

OnPoint Child and Family Teams work together to make a plan based on the family's strengths and goals.

## PARENT SUPPORT PARTNER

---

The Parent Support Partner service helps families get more involved in mental health treatment and gives parents the skills they need to handle the challenges of raising a child with special needs. As a peer service, this program is provided by parents and/or caregivers who have lived experience and have a child with mental health or developmental challenges.

This service helps improve outcomes for youth with serious emotional or intellectual/developmental issues who are part of the public mental health system.

## YOUTH PEER SUPPORT

---

The goals of Youth Peer Support are to help empower youth, assist them in building skills to improve their functioning and quality of life, and work together with others involved in their care.

## FAMILY SUPPORT AND TRAINING (FST)

---

FST is a program that gives parents and caregivers tools to reduce problem behaviors and improve communication, life skills, and social skills at home and in the community.
